## Updated Website

Check out our newly updated website... we've got easy directions to our shop, new photos of the production department, description of our document management service,

examples of projects that were heat pressed, vinyl stickers for vehicles, a link to our new and improved 24/7 public and private planrooms, inventory to purchase, and so much

more! Make sure to watch the instructional videos on how to navigate the new 24/7 online planroom!

## Prints & More Planroom

We are proud to introduce the new and improved Prints & More Planroom! Now you are able to view and order drawings from our website 24/7. We will be having both private and public jobs. We are going to be working hand in hand with the General Contractors and Architects to send you a "job key" with their request for bid so that you will be able to access their private jobs. Another key feature of the [planroom](#) will be the calendar that will show you the bid dates for when public jobs are due or when any of the private jobs that you have the "job key"

for are due... After looking at the drawings in the [planroom](#) you are able to easily order them with a quick click of the whole construction trade or individual sheets. Keep track of your total purchase in the shopping cart on the screen after each click. If you have any drawing files you need printed check out our easy to use "Send us files" link. This will make submitting jobs easier and quicker. Also another great reason to visit now: a special two month introductory offer... free usage of our [planroom](#), all you have to do is log in and place your order.
